Web Application Penetration Tester — Cybersecurity Enthusiast

Objective

Aspiring Web Penetration Tester with hands-on experience in identifying vulnerabilities and building secure systems. Looking to apply offensive security knowledge to real-world cybersecurity challenges.

Technical Skills

- **Pentesting Tools:** Burp Suite, OWASP ZAP, Nikto
- **Exploitation:** Metasploit, SQLMap
- **Networking:** Nmap, Wireshark
- **Scripting:** Python, Bash
- **Key Areas:** OWASP Top 10, IDOR, XSS, SQLi, CSRF, RCE
- **Mobile Security:** ADB, DIVA App Analysis

Projects

Secure File Sharing Platform

Flask-based file-sharing application with AES encryption, short session expiry, and zero-storage policy for enhanced privacy.

Tech Stack: Python, Flask, HTML/CSS, AES, MongoDB

DIVA Android App Pentesting

Tested the DIVA app for known vulnerabilities including Insecure Data Storage and Improper Input Handling using ADB and static code review.

Certifications

- Infosys Springboard – Metasploit and Cybersecurity
- Virtual Cybersecurity Internship – Digital Forensics (3 months)
- OPSWAT Certified: CIP, File Security, Data-Transfer, Secure Storage, Legacy Systems, Web-Traffic, Email Security (Valid till 2026)

Internship Experience

Virtual Cybersecurity Internship (Digital Forensics)

Self-paced 3-month virtual internship covering cybercrime investigation techniques and forensic evidence handling.

CTF Experience

Participated in Capture the Flag (CTF) organized by Acropolis Institute in collaboration with Indore Police. Focused on real-world vulnerabilities in web apps.

Education

B.Tech – Computer Science Engineering

IES IPS Academy, Indore

2023–2027

Soft Skills

Analytical thinking, problem-solving, collaborative mindset, rapid adaptability in fast-paced environments, **Basic Japanese** .
